

# **Vibration Switches**

#### What is a vibration switch?

A vibration switch is a device that (1) recognizes the amplitude of the vibration to which it is exposed and (2) provides some sort of response when this amplitude exceeds a predetermined threshold value. The switch response is typically an electrical contact closure or contact opening. The electrical contact may be either an electromechanical relay or solid-state triac.

## Why use a vibration switch?

Vibration switches are primarily used for protecting critical machinery from costly destructive failure by initiating an alarm or shutdown when excessive vibration of the machinery is detected. Conversely, a vibration switch can be utilized to warn when there is an absence of vibration, such as when a conveyor ceases to function due to a broken drive belt.

#### **Applications**

- Cooling Tower Fans & Gearboxes
- Fin Fans
- HVAC Systems
- Blowers
- Motors
- Pumps
- 24/7 Machinery Protection

## **Electronic Vibration Switch**

## Series 685B

### **Product Highlights**

- Offers two set points with individual alert and alarm relays
- 4-20 mA output signal for vibration monitoring
- Analog, 100 mV/g output signal for fault diagnostics
- Utilizes built-in or remote vibration sensor
- Adjustable time delays for alert or alarm
- Accepts 4-20 mA calibrator input signal for accurate threshold value set-up
- Explosion proof models available\*

**Electronic switches** require power to operate and utilize an input signal that is provided by an electronic vibration sensor, or accelerometer. This sensor may be built into the switch enclosure, or remotely located. A remote sensor is advantageous when the vibration switch enclosure will not fit within the installation location, or if the temperature at the installation location exceeds the capability of the switch's electronic components.

The 685B series are precision electronic vibration switches. They provide two relay or triac outputs, generate a 4-20 mA vibration output signal, and offer an analog vibration signal for FFT analysis and fault diagnostics.

Model Number	Series 685B	
Measurement Range (pk)	1.5/3.0 in/sec, 5g, or 15/50 mils (pk-pk)	
Frequency Range (±3 dB)	120 to 60k cpm [6]	
	2 to 1000 Hz	
Power	85 to 245 VAC, 50-60 Hz or 24 VDC (10%)	
Relay Types*	SPDT Form C Relay or Triac	
Relay Rating	10A 30VDC/240VAC (Relay) or 230 VAC 5A (Triac)	
Relay Contacts	Normally Open or Normally Close	
Relay Latching	Latching or Non-Latching	
Output (RMS Vibration)	4-20 mA	
Output (Analog Vibration)	100 mV/g	
Output (Analog Vibration)	10.2 mV/(mm/sec2)	
Delay (Alarm)	See "Ordering Guide" (right)	
Set Point Adjustment	Single Turn Potentiometer	
Reset Function	Internal Pushbutton or Remote Sw	
Physical		
Size	3.5 x 2.8 x 3.5"	
2156	90 x 70 x 90 mm	
\A/=:=h+	1.85 lb	
Weight	839 gm	
Sensing Element	Internal Piezoelectric Accelerome	
Housing Material	Aluminum Alloy	
Enclosure Rating	NEMA 4X	
enclosure nating	IP66	
Mounting Torque (Cover Screw)	4.1 ft-lb	
Enclosure Ports	Cord Grips or Conduit Hubs	
Operating Temperature Range	-22 to 158 °F	
	-30 to 70 °C	
Hazardous Area Approval*	Class 1 Div 1 or Class 1 Div 2, AB

## **Smart Vibration Switch**

## Series 686C

### **Product Highlights**

- Fully USB programmable for consistent results
- Solid state relay for reliable operation
- 2-wire operation uses existing mechanical switch wires
- Eliminates false trips with programmable delays
- Remote Reset Anywhere<sup>TM</sup> for safety and convenience
- Exclusive MAVT<sup>TM</sup> sets alarm threshold automatically
- Hazardous area approvals available\*

#### **USB Programmable Settings Include:**

- Alarm threshold level & hysteresis
- Power-on, startup, & operating delays
- Normally open or normally closed
- Latching or non-latching
- Residual vibration level

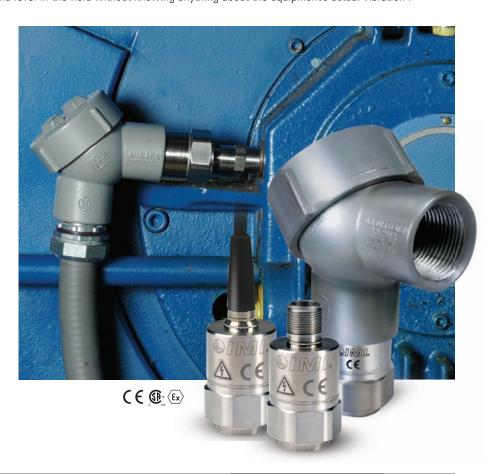

The Smart Vibration Switch is highly versatile, fully user programmable via USB, low cost, and a drop-in replacement for most popular mechanical vibration switches. The Smart Vibration Switch provides the reliability not found in mechanical switches. It is a lower cost alternative when single relay action is required vs. higher cost dual relay models.

This revolutionary two-wire electronic switch offers the simplicity of a mechanical switch with the precision of an electronic switch. It has a built-in piezoelectric accelerometer, installs easily, and has the smallest footprint of any vibration switch on the market.

The Alarm Threshold Level (set point) can also be set using Magnetically Adjustable Vibration Threshold (MAVTTM). The Exclusive MAVTTM feature can be used to automatically set the alarm threshold level in the field without knowing anything about the equipment's actual vibration.

Technical Specifications		
Model Number	Series 686C	
Measurement Range (pk)	0.25 to 4.0 in/sec	
	4.5 to 8.0 mm/sec	
Frequency Range (±3 dB)	180 to 60k cpm	
	3 to 1000 Hz	
Power	24 to 240 V AC/DC, 50 to 60 Hz	
Relay Types	SPST Form A or B MOSFET	
Relay Rating	0.5A 24 to 240 V AC/DC	
Relay Contacts	Normally Open or Normally Closed	
Relay Latching	Latching or Non-Latching	
Set Point Adjustment	USB Programmable Values	
Reset Function	Remote Power Interrupt	
Physical		
0'	1.25" Hex, 2.6" h	
Size	31.8 mm Hex, 66mm h	
Weight	5.2 oz	
	148 g	
Sensing Element	Internal Piezoelectric Accelerometer	
lousing Material	Stainless Steel	
Tanlanus Datina	NEMA 4X	
Enclosure Rating	IP66	
Connector Types	2-pin MIL, Integral Cable, or Screw Terminal	
Oti Tti D	-40 to 185 °F	
Operating Temperature Range	-40 to 85 °C	
Hazardous Area Approval*	Class 1 Div 1 or Class 1 Div 2, ABCD	
686C01 Default Settings	MAVT Activated, 0.60 ips Alarm Threshold, 6% Hysterisis, 6 second Operational Delay, Latching Normally Open Relay, 3 seconds Power On Delay, 3 second Startup Delay, 2x Alarm Threshold during startup, 5% Residual Vibration Level

## **Mechanical Vibration Switch**

## Series 685A

### **Product Highlights**

- Unique patent pending, spring-loaded, magnetically coupled sensor, requiring no power
- Offers cost effective protection for less critical situations
- Provides better control over trip sensitivity
- **NEW!** Remote reset models available
- Hazardous area approvals available

For machines requiring simplified contact closure protection, 685A series offers a cost-effective approach to vibration protection. They offer the smallest mechanical switch footprint available in either NEMA 4 or explosion proof housings. The three axis protection allows confident, reliable monitoring of small plant equipment in less critical situations, where the precision of an electronic switch isn't necessarily required. Both the weatherproof and explosion proof versions contain manual internal adjustability with both manual and remote reset options availability for ease of operation.

Model Number	Series 685A	
Measurement Range (pk)	7 g pk	
	68.7 m/s <sup>2</sup> pk	
Frequency Range (±3 dB)	120 to 60k cpm	
	0 to 100 Hz	
Power	n/a	
Relay Types	2 x SPDT (DPDT) Form C Relay	
Relay Rating	5A 480 VAC, 15A 250 VDC	
Relay Contacts	2 x SPDT (DPDT)	
Relay Latching	Latching	
Set Point Adjustment	Linear Adjust Control Screw	
Reset Function	Manual and Remote Reset Options Available	
Physical		
Size	4.35 x 3.30 x 4.35"	
3126	110.5 x 110.5 x 83.8 mm	
Moight	2.5 - 2.8 lb	
Weight	1132 - 1271 g	
Sensing Element	Spring Loaded Magnet (Linear Adjus	
Housing Material	Aluminum Alloy	
Factories Dating	NEMA 4X	
Enclosure Rating	IP66	
Enclosure Ports	Conduit Hubs	
Operating Temperature Range	-13 to 140 °F	
	-25 to 60 °C	
Hazardous Area Approval*	Class 1 Div 1 or Class 1 Div 2, ABCD
