

SERIES 3711F, 3713F, 3741F & 3743G

VC MEMS ACCELEROMETERS

Measurement ranges from ± 2 to ± 200 g
Broad frequency response
Reduced spectral noise
Improved broadband resolution
Single-ended or differential output signal
Lightweight and rugged housings

TYPICAL APPLICATIONS

Aerospace Vibration Testing - Flutter/Buffeting & Landing Gear

Simulated Environmental Testing with Shakers & Centrifuges

Suspension, Shock Absorption, and Damping

Driveability, Ride & Handling

Brake & Steering Development

Road Load Data Acquisition (RLDA)

Series 3713F

Series 3743G

Series 3711F

LOW FREQUENCY MEASUREMENTS WITH GAS-DAMPED, SILICON MEMS TECHNOLOGY

PCB® Series 3711 (single axis), 3713 (triaxial), and 3741 (single axis, differential output), and 3743 (triaxial, differential output) variable capacitance MEMS (VC MEMS) accelerometers are designed to measure low-frequency vibration and motion and are offered in full-scale ranges from \pm 2 to \pm 200 g to accommodate a variety of testing requirements. The units feature gas-damped, silicon MEMS sensing elements for uniform, repeatable performance and offer high frequency overload protection.

Electrically, the units offer a single-ended or differential output signal with power, signal, and ground leads for each channel. Supply voltage regulation permits operation from +5 up to +32 VDC and the low-noise, low-impedance output signal may be transmitted over long cable lengths without degradation.

As with all PCB instrumentation, these sensors are complemented with toll-free applications assistance, 24-hour customer service, and are backed by a no-risk policy that guarantees total customer satisfaction.

The rugged and durable single ended output Series 3711 & 3713 VC MEMS accelerometers are hermetically sealed in a robust titanium housing allowing for a very stable and accurate measurement in the most severe operating environments. In addition, this series is inherently insensitive to base strain and transverse acceleration effects. Supply voltage regulation permits operation from +5 to +28 VDC and the single-ended, low-noise, low-impedance output signal may be transmitted over long cable lengths without degradation. The series is available in single axis and triaxial versions with a multi-pin, threaded, electrical connector for easy installation and setup.

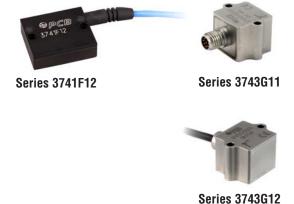

Series 3711F11

Series 3713F11

The precision Series 3741 and 3743 VC MEMS accelerometers offer a differential output signal for common-mode noise rejection and incorporate many advanced features. This includes supply voltage regulation and a temperature compensation circuit for stable performance over the entire operational temperature range. The 3741 features a low profile and lightweight hard-anodized aluminum housing with an integral, 4-conductor 10 ft (3 m) shielded cable. An optional mounting adaptor, 080A208, facilitates biaxial or triaxial configurations. The 3743 features a rugged, hermetic Stainless Steel package with an integral M8x1 8-pin connector or an integral cable rated to IP67 for stable performance in extreme measurement environments.

SINGLE ENDED OUTPUT – VC MEMS								
Sensitivity		rement e (pk)	Frequency (± 5%)		Broadband Resolution (rms)			
6.75 mV/g	± 20	00 g	0 to 1500 Hz		6.0 mg			
13.5 mV/g	± 10	00 g	0 to 1500 Hz		3.0 mg			
27.0 mV/g	± 5	0 g	0 to 1500 Hz		1.5 mg			
45.0 mV/g	± 3	0 g	0 to 1500 Hz		0.9 mg			
135 mV/g	± 1	0 g 0 to 1000 Hz			0.3 mg			
675 mV/g	± 2	2 g 0 to 250 Hz			0.06 mg			
Model Number		3711 Single Axis		3713 Triaxial				
Overload Limit (Shock)		± 5000 g pk		± 5000 g pk				
Temperature Range		-65 to +250 °F (-54 to +121 °C)		-65 to +250 °F (-54 to +121 °C)				
Excitation Voltage		5 to 32 VDC		5 to 28 VDC				
Housing Material		Titanium		Titanium				
Sealing		Hermetic		Hermetic				
Size (H x L x W)		0.45 x 0.85 x 0.85 in (11.4 x 21.6 x 21.6 mm)			0.80 in cube (20.3 mm cube)
