To Whom It May Concern:

STATEMENT REGARDING REACH REGULATION

As part of our commitment to supply environmentally-safe products throughout the world, PCB supports the aim of the European Regulation EC 1907/2006 on the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH). On January 2025 the candidate list of EU SVHC has been updated to include 247 substances (the "Candidate List"). All PCB products, to the best of our knowledge, are compliant to the current regulations. We base this declaration of conformity on the wording of the REACH Regulation and the guidelines given in "REACH – Guidance on requirements for substances in articles", issued by the European Chemicals Agency (ECHA). We base our declaration on the following:

Products produced and sold by PCB are regarded as Articles, not Substances or Preparations, under REACH. The Substances or Preparations contained in the Articles manufactured by PCB are not intended to be released during normal and reasonably foreseeable conditions of use. Based on the foregoing, we believe that PCB is not required by applicable law to take any further actions under the REACH Regulation.

PCB bases its material content knowledge partly on information provided by third parties, and risk assessments, PCB has taken, and continues to take commercially reasonable steps to provide representative and accurate information. However, PCB may not have conducted destructive tests or chemical analysis on incoming material and chemicals.

The information provided in this letter is true and correct to the best of our knowledge based on having taken commercially reasonable review steps. Both PCB and its suppliers consider certain information to be proprietary and therefore, CAS numbers and certain other information is not available for release.

If we subsequently identify a registration requirement for any Substance or Preparation in Articles we have been producing or importing, it is our intent replace that substance with an appropriate substance as soon as possible.

As the SVHC List is updated, we will endeavor to promptly remove any substances of concern customers if we know that a product produced by PCB contains more than 0.1% w/w Substances of Very High Concern.

Please let me know if you have any questions or need further information.

Very Truly Yours,

Wendy Willard
