

To Whom it May Concern,

We are responding to the request for environmental information regarding PCB Piezotronics, Inc.'s position on the European Union's RoHS regulations. The following information is provided to you to address this topic.

STATEMENT REGARDING EUROPEAN UNION ROHS

As part of our commitment to supply environmentally-safe products throughout the world, PCB Piezotronics, Inc. supports the aims of the European Union's Restriction of Hazardous Substances in Electrical and Electronic Equipment (as most recently amended in accordance with RoHS 2015/863 (considered RoHS 3)).

As a manufacturer of industrial control and monitoring equipment falling under Category 9 of the RoHS Directive, and sometimes Category 11. PCB's products came into Scope for RoHS on July 22, 2017. PCB recognizes its responsibility to provide environmentally friendly products and produces products which are not intentionally manufactured with any of the ten RoHS restricted substances (Lead, Mercury, Hexavalent Chromium, Polybrominated Biphenyls (PBB), Polybrominated Diphenyl Ethers (PBDE), Bis(2-Ethylhexyl) phthalate (DEHP), Benzyl butyl phthalate (BBP), Dibutyl phthalate (DBP), or Diisobutyl phthalate (DIBP)) above 0.1% and Cadmium .01% w/w.

Any PCB model that is CE Marked complies with all the applicable EU Directives, including the RoHS Directive. Our Product specific Declarations of Conformity attest that we meet the Essential Requirements of the RoHS Directive along with all of the other requirements for CE Marking. The exemptions Annex III 6 and 7 and Annex IV 26 apply to our products. We also understand that Annex II of Directive 2011/65/EU (RoHS 2) was amended by Directive 2015/863/EU and came into effect in for Products in Category 8 and Category 9 in July 2021. We are making the due diligence efforts necessary to ensure the phthalates added to Annex II restricted list are not contained in any products produced by PCB for sale into the EU after the effective date of the restrictions.

Please note that PCB bases its material content knowledge partly on information provided by third parties and will take commercially reasonable steps to provide representative and accurate information; provided, however, that PCB may not have conducted destructive tests or chemical analysis on all incoming material and chemicals.

Please contact us if you require further information concerning specific PCB products and the RoHS Directive.

Sincerely;

Wendy Willard
